# INDUSTRY-READY TRAINING PROGRAM WITH PLACEMENT GUIDANCE

## DATA ANALYTICS

- **Module 1 - Intro to Microsoft Excel:** Learn Microsoft Excel basics for organizing data efficiently.
- **Module 2 - Excel Basics:** Rows and Columns: Navigate rows and columns in Excel for data management.
- **Module 3 - Microsoft Excel Essentials:** Master Excel essentials like formulas, sorting, and filtering techniques.
- **Module 4 - Formatting in Excel:** Enhance data presentation with Excel formatting tools and styles.
- **Module 5 - Referencing and Arithmetic Functions:** Use cell referencing and arithmetic functions in Excel calculations.
- **Module 6 - Logical Functions:** Apply logical functions like IF and OR in Excel.
- **Module 7 - Lookup Functions:** Master lookup functions like VLOOKUP in Excel for data retrieval.
- **Module 8 - Advanced Functions and Data Validation:** Explore advanced functions and data validation in Excel sheets.
- **Module 9 - Date and Text Function:** Manipulate dates and text using Excel functions effectively.
- **Module 10 - Data Analysis Tools:** Use Excel data analysis tools like Goal Seek for insights.
- **Module 11 - Data Visualization (Charts and Pivot Tables):** Create charts and pivot tables for data visualization in Excel.
- **Module 12 - Conditional Formatting:** Highlight data with conditional formatting rules in Excel sheets.
- **Module 13 - Macros in Microsoft Excel:** Automate tasks in Excel using macros and VBA scripts.
- **Module 14 - Data Protection:** Secure your data in Excel with protection features.
- **Module 15 - Data Cleaning:** Clean and prepare data in Excel for accurate analysis.
- **Module 16 - Advanced Functions:** Use advanced Excel functions for complex data manipulation tasks.
- **Module 17 - Solver and Goal Seek:** Solve problems using Solver and Goal Seek in Excel.
- **Module 18 - Collaborative Tools:** Collaborate on Excel sheets using collaborative tools and features.
- **Module 19 - Power Query:** Import and transform data with Power Query in Excel.
- **Module 20 - Dashboards:** Build interactive dashboards in Excel for data monitoring purposes.
- **Module 21 - Power BI Basics:** Learn Power BI basics for creating interactive data visualizations.
- **Module 22 - Power BI Advanced:** Create advanced visualizations and models in Power BI.
- **Module 23 - Automation with Excel:** Automate repetitive tasks in Excel with advanced features.
- **Module 24 - SQL Basics for Data Analysis:** Use basic SQL queries for effective data analysis.
- **Module 25 - Advanced SQL for Reporting:** Master advanced SQL for creating detailed data reports.
- **Module 26 - Descriptive Statistics and Data Types:** Summarize data with descriptive statistics and data types.
- **Module 27 - Probability and Probability Distribution:** Model data uncertainty with probability and distribution concepts.
- **Module 28 - Inferential Statistics and Hypothesis Testing:** Draw conclusions using inferential statistics and hypothesis testing.
- **Module 29 - ANOVA, Chi-Square, and Data Cleaning:** Use ANOVA, Chi-Square, and clean data for analysis.
- **Module 30 - Introduction to R and Data Types in R:** Learn R basics and data types for data analysis.
- **Module 31 - R Programming Fundamentals:** Master R programming fundamentals for effective data manipulation.
- **Module 32 - Python Basics:** Learn Python basics for data science and analysis tasks.
- **Module 33 - Data Visualization with Pandas, NumPy, and Matplotlib:** Visualize data using Pandas, NumPy, and Matplotlib in Python.

# CAREER ORIENTED ADVANCED SKILL DEVELOPMENT PROGRAMS

**Data Science & Analytics Training:** Master tools like Python, R, SQL, and Machine Learning while gaining hands-on experience with real-world datasets. Learn to analyze data, build predictive models, and make data-driven decisions.

**Artificial Intelligence Training:** Dive into AI with neural networks, TensorFlow, PyTorch, NLP, and computer vision. Develop intelligent systems and AI-powered applications through practical, industry-relevant training.
